Project Name: Book Management

App Name: books

Objective:

Create a Django project that allows authenticated users to manage a list of books using a single model and full CRUD functionality.

Authentication Features:

- User Registration

- Login

- Logout

- Only logged-in users can:

    o Add new books

    o Edit their uploaded books

    o Delete their uploaded books

Model: Book

 -title

 -author name

-description

 -book image

-create at

-update at

Required Features:

- admin panel access

- Basic layout with Bootstrap or CSS

- CRUD Views:

    o Create Book

    o Read (List + Detail View)

- o   Update Book

- o   Delete Book

- Templates should extend a base.html layout

- Add a thumbnail-style card design to display each book
